## Letter of Recommendation

It gives me immense pleasure to recommend Ms. ManjiriVirkar for graduate studies at your esteemed university. Over the last eight years of my teaching experience, I have taught many students, coming from varied backgrounds and possessing a wide spectrum of talents, abilities and personality traits. I would place Manjiri among the top 2 percentile of all the students whom I have taught. Manjiri has been my student during her Master of Science (Computer Science) for 2 years between 2016 and 2018. I have taught her various subjects during this period, including Principles of programming language (Semester 1), Programming with DOT NET (Semester 3) along with a laboratory course.

Manjiri is a sincere and hard-working student with unparalleled self-drive to excel in her chosen field of studies. She has been consistent in her academic performance, retaining her class rank throughout M.Sc. Computer Science program. Her performance in subjects such as Principle of programming language (PPL), Programming with DOT NETwere exemplary, demonstrating her keen interest in these topics. She completed her academic project "SpyWare" under my guidance in Semester 1. Her ability to ask the questions and conduct her own research and studies out of the classroom, not only helped facilitate enriching discussions in the class but also reflected her potential for research.

She was actively involved in research activity conducted by college in collaboration with "Research Development and Innovation Lab, Pune, India" (www.rdil.in). She worked on a concept of unique identification of a person with the help of face and fingerprint recognition. I foundManjiricurious about understanding the science behind the research. She had an eye for observation and she was meticulous in recording them carefully. Her originality and ability to make creative decisions helped us complete the prototype in a short span of time. During her internship, she worked on live project and completed all her tasks on time. She was very well appreciated by her mentors for her work.

On a personal level, Manjiri is a well-rounded person, with a lot of enthusiasm for sports and extra-curricular activities. She has also shown her adeptness at organizational skills, especially in a cross-cultural setting. She is approachable and easy to communicate with.

I concur with her decisions to pursue graduate studies and strongly recommend her for admission at your university.

Sincerely,

Sysatpute

Mrs.Swati Satpute,
Assistant Professor,
Department of Computer Science,
Fergusson College, (Autonomous) Pune
