FERGUSSON COLLEGE
(AUTONOMOUS)
PUNE - 411 004, MAHARASHTRA, INDIA.

Empowered Autonomous College (Under Savitribai Phule Pune University)
(ID No. PU/ PN/AS/ 002/1885) Reaccredited with "A+" Grade by NAAC(4th Cycle) | AISHE Code : C - 41431
UGC Special Heritage Status | UGC - College of Excellence (CE) | DBT - STAR Status

Estd.1884

Letter of Recommendation

I am pleased to recommend Miss Anagha Godbole for the MS in Computer Science at your esteemed university. I have known her in the capacity of a professor since her first semester, and have taught her subjects like Principles of Programming Languages(PPL) and Programming with C# .NET. I have also been her project guide for the semester and lab in-charge for an academic year. This interaction allowed me to assess her skills as a student during this period.

Anagha actively participated in the classroom discussions and never hesitated to put forth her points or doubts. During my lectures on Principles of Programming Languages, there was always a zest visible in her to understand the internals of languages and the avidness to try them in the lab. Her problem solving attitude helped her a lot while learning LISP, Prolog. Her approach was careful and logical, aiming to simplify the complexities as much as possible. In her lab sessions, she showed great interest in experimenting with concepts from the taught chapters. She not only completed the assignments on time but also did them thoroughly and meticulously.

I was the project guide for Anagha's group during her 1st semester of M.Sc. Computer Science. The team decided to work on an assistive mobile application, namely I-SEE, an android app for visually impaired people to help them overcome hurdles they face in day-to-day life. This challenging topic required thorough analysis and careful selection of libraries and APIs to meet the project's requirements. Though the team was new to Android development, they showed a positive attitude and good efforts to learn the concepts and implement the feature. Anagha worked on the Read for Me and Speed Dial features, which required some understanding of domain knowledge, but she successfully implemented these features, showcasing her commitment to learn and grasp of domain knowledge. She was always open to suggestions provided by me and ready to work during this engagement. The team faced a lot of technical challenges such as consuming Third Party APIs and Components initially, however, they successfully completed the project within the given time period and demonstrated in the final review.

On a personal level, Anagha is a sincere individual and always shows a positive attitude towards every situation. Her perpetual enthusiasm for learning and eagerness to take on challenging projects make her a good student. I strongly recommend her to your college for graduate admission, without any reservations. I wish her the best for the future. Please feel free to contact me if you have any queries regarding this recommendation.
